PROFILE

As a recent graduate with a Bachelor's degree in Computer Science Engineering, I possess a strong foundation in programming and computer science principles, particularly in Java and its frameworks such as Spring and Hibernate. Additionally, I have strong leadership abilities and effective communication skills, making me a valuable asset to any team I contribute to. I am eager to join an innovative team to improve my skills and gain hands on experience on new tech.

INTERSHIPS

Persistent Martian Program 2023, Pune Aug 2023 - Sep 2023
Intern

- Completed four comprehensive training courses in Linux fundamentals, data structures, database management systems (DBMS), and Python programming, further enhancing my technical knowledge and skills.
- Demonstrated a strong commitment to learning and professional growth by successfully completing the program, expanding my foundational understanding of computer science and software development.

Integrates Computers Pvt Ltd, Pune March 2023 - May 2023
Trainee Engineer

- Received comprehensive training in the company's activities, gaining a holistic understanding of its IT operations.
- Acquired practical skills in various IT and networking areas, including OS installation, N Computing device management, NAS configuration, server management, and firewall technologies.

PROJECTS

Facial Recognition based Attendance Management System Oct 2023 - March 2024

- Implemented a dual-camera setup for robust facial recognition at classroom entry/exit points, featuring advanced attendance management with time-stamped accuracy. Developed a comprehensive database to store student details and face images for feature extraction.

Bank management system Sep 2022 - Nov 2022

- Developed a user-friendly Bank Management System using Core Java, Swing, and AWT, facilitating efficient desktop banking operations. Seamlessly integrated MySQL database for secure storage and retrieval, enabling tasks like customer management and transaction tracking.
